

Fund Characteristics

The Europpportunity Bond is a so called Convergence-Bond-Fund. The Fund invests in bonds of EU accession countries or those aspiring to accession, and Eastern European bonds, predominantly in bonds denominated in Euro or based on excellent macroeconomic fundamentals directly in the local currency.

Characteristically, the fund takes advantage of yield enhancements of various Government and Corporate borrowers against German or Austrian government bonds, based on utmost care regarding the quality of the debtor with respect to his yield enhancement.

The most important principle is to evaluate the debtor quality first (in general only a limited part of investment below Investment-Grade and then only when perspectives have shown dramatic improvements in the near past and/or a rating-upgrade is expected).

Fund Manager's Comment

Last month the European bond market for government bonds was stronger. The Bund-Future closed the month at a level of 161,82 points. That represents a 10-year yield of 0.286%.

The very low and negative yields for government bonds are reflecting the current liquidity supply policies by the central banks worldwide.

For corporate bonds spreads narrowed, resulting in higher prices. Eastern European bonds were stronger last month. Russian bonds were too weaker despite the Minsk Agreement, yield spreads widened by up to 10 bps.

Performance since 2nd of January 2009

	1 Jahr	2 J. p.a.	3 J. p.a.	5 J. p.a.	10 J. p.a.
Europpportunity Bond	-1,09%	-0,43%	0,15%	0,31%	2,58%
