

**Fund Characteristics**

The USD CONVERGENCE Bond follows on the successful performance of Euram's Euro denominated Euroopportunity Bond with a similar philosophy that focuses on a USD basis.

As a so called Convergence-Bond-Fund, it invests in bonds of EU accession countries or those aspiring to accession and Eastern European and CIS bonds, predominantly in bonds denominated in USD or – given excellent macroeconomic fundamentals – directly in the local currency. Characteristically, the fund takes advantage of yield enhancements of various Government and Corporate borrowers against Treasuries and German or Austrian government bonds. We take utmost care regarding the quality of the debtor with respect to his yield enhancement.

The most important principle is to evaluate the debtor quality first (in general only a limited part of investments below Investment-Grade and then only when perspectives have shown dramatic improvements in the near past and/or a rating-upgrade is expected) to achieve a long-term outperformance against the EFFAS-USD-Govt Index.

**Fund Manager's Comment**

Last month the US Treasury Future fell to a level of 142.00 points. Presently, the yield on the 10 Year Bond is at a level of 3.22% and the yield on the Long-Bond is at 2.95%.

The very low yields for government bonds are reflecting the current liquidity supply policies by the central banks worldwide.

For corporate bonds spreads widened, resulting in lower prices. Eastern European bonds were weaker last month. Russian bonds were too weaker despite the Minsk Agreement, yield spreads widened by up to 10 bps.
